Versions

1.0

intial launch and airdrop phase

1.1

Added UTXO chain bridging for long term storage security

2.0 (Q3 2022)

Will bridge to Layer 2 with Syscoin's Rollux upgrade. Will bring near instant transactions.

Team

thatsusgirluttke.sys (USA)

Creator and lead developer of systems and former Linux sysadmin. Handles documentation and project art as well. Believes not your server not decentralized means as much as not your keys, not your coins.

alter.sys (Parts unknown)

Developer brought on just recently to advise on the development environment and ways to automate and secure for remote and public access. Also the creator of the famous Syscoin tip bot which we plan to incorporate in our own server.

raphael.sys (Nigeria)

Lead Discord designer and moderator, there since day one. Handled Discord server setup and lead on the airdrop initiatives at launch.

jimmy.sys (Nigeria)

Discord moderator and valued style advisor. Early riser so don't think you can come and act the fool just cause it's early.
